PROFESSIONAL SUMMARY

Driven 4th-year Computer Science student with practical experience in Full-stack Web Development, Machine Learning and Python based Data Analytics. Hands-on builder with 4+ projects spanning real-time application, ML pipelines, and AI-powered system.

EDUCATION

B.Tech in Computer Science Engineering

Pimpri Chinchwad University (PCU) -School of Engineering and Technology,
Pune

2023 – 2027

CGPA:7.47 / 10

Higher Secondary (HSC - Science)

Abhishek Vidyalayam, Junior collage, Pune

2023

Percentage:59.33%

Secondary School (SSC - MSBSHSE)

Abhishek Vidyalayam School, Pune

2021

Percentage: 70.60%

PROJECTS

RAG-Based Enterprise Knowledge Assistant [GitHub](#)

Python ,LangChain , FAISS ,Ollama(Llama 3.2:3B), Flask

- Engineered a **Retrieval-Augmented Generation (RAG)** system for document-based question answering using LangChain, FAISS, and Llama 3.2.
- Optimized semantic search through vector embeddings and similarity-based retrieval, enabling precise context extraction from large PDF documents.
- Designed an interactive interface for real-time document querying, delivering reliable AI-generated responses with low latency.

Multi-Agent Research System [GitHub](#)

Python, LangChain, LangGraph, Google Gemini API, BeautifulSoup4

- Developed a **Multi-Agent AI System** where specialized agents collaborated to handle complex tasks, enabling efficient problem-solving and high-quality response generation.
- Designed and implemented **agent orchestration and intelligent task routing** using Python, allowing seamless coordination and execution across multiple AI agents.
- Integrated Google Gemini API and web-scraping tools to automate information gathering, analysis, and context-aware response generation.

TECHNICAL SKILLS

Programming Languages: Python, C, HTML, CSS

Libraries/Frameworks: Pandas, Numpy, Django, Flask, Scikit-learn, Matplotlib, LangChain, LangGraph

Technical Domains: RAG Pipelines, Machine Learning, Data Preprocessing, Model Training.

Databases: Chroma DB, MongoDB, MySQL

CS Fundamentals: Computer Networks, Operating System, Object-Oriented Programming

Tools/Platforms: Git, GitHub, Docker, VS Code, IntelliJ IDEA, Jupyter Notebook, Google Colab, Postman, Vercel

CERTIFICATIONS

IBM Machine Learning Professional Certificate - AI/ML

Red Hat Linux Fundamentals - Linux Commands, File System, Permissions & Shell Basics

Software Engineering Specialization - Focused on SDLC practices, software design, testing, and maintenance.

ACHIEVEMENTS & ACTIVITIES

Developed multiple AI and full-stack website projects during undergraduate studies. [Portfolio](#)

Actively exploring LLMs, MCP, and AI System Design while building Generative AI.

Strengthening problem-solving skills through Data Structures & Algorithms (DSA) and competitive programming practice. [LeetCode](#)
